

The second large batch of humanitarian aid (around 500 kg) from Germany, Norway and France has already found its recipients. Thanks to Zhytomyr city children's NGO "We do everything ourselves", people who had to leave Kherson, Kharkiv, Luhansk and Donetsk regions and who have now found their shelter in Zhytomyr and people in need of help received packages with hygiene products, food for children and babies, clothes, warm clothes, etc.

We are posting some photos with the consent.

Now our partners in Germany [Solidarität International e.V. Regionalgruppe Saar](#) are collecting a new batch. Also, members of our NGO, who are in different parts of the world, are collecting aid in Norway (special thanks to the municipality of Ardal) and France. We want to thank Hans Olaf Heslien for opening the collection and helping to cover part of the fuel. There are really a lot of requests and despite the large number of volunteers and help, they do not have time to cover them. Unfortunately, the number of needs is only growing over time.

If you are able to help with covering the fuel and road for our miracle drivers or have organizations in Europe that can supply even more baby food, diapers for children and the elderly - we will be grateful for your help. Also, if you are a representative of a public organization, foundation or government agency that helps people affected by the war - write to messenger.
